## 2. Trim tail

Enter new CutOut that has less value than current value to trim the tail.
Press Apply

Original Timeline

Ex. change CutOut on shot_020 from 200 to 180

With linked shot checked
next shot will be extended
to fill the gap

shot_020 will be trimmed to frame 180 and
leave a gap between shot_020 and shot_030

shot_020 will be trimmed to frame 180
and shot_030 will be extended to fill the gap

All keyframes remain the same
