# Add shot in a gap between 2 shots

If there is a space between shot, we can
insert a new shot into the gap.

1. Select a shot "Before" or "After" the space.
2. Check "Add shot in gap"
3. If a gap is after selected shot, choose "After"
   if a gap is before selected shot, choose "Before"
4. Specify Start frame / End frame
5. Add Shot

** If the duration of a new shot is greater than
the gap, shot will not be created.

Current time line

New shot will be inserted between shot_020 and shot_030, no keyframes are moved.
