# Shift Frame

Shift Frame is use to move all the keyframes in the timeline.
A number greater than 0 mean move forward, on the other hand,
number less than 0 (minus) mean move backward.

if "move from current frame" check box is checked,
all keyframes after current time will be moved.

Ex. move 20 frames

If check "move from current frame"

Current time line

All keyframes in time line will be moved for 20 frames

Ex. current frame is at frame 150

All keyframes from 150 will be moved for 20 frames
